

Wookey Primary School Shared Pedagogy

At Wookey Primary School, we believe all learning should be active, supportive and inclusive. We focus on 5 key principles, rooted in research, to shape how children learn in every classroom.

Small Steps

Key knowledge is taught in small, manageable steps with purposeful questioning to deepen thinking. Prior learning is regularly revisited and connected so new ideas build securely on what children already know.

Build Habits that Build Attention

Lessons follow a simple, clear structure using an 'I do, we do, you do' approach. Teachers vary their tone to maintain engagement, and classrooms are kept tidy and uncluttered to support focused learning.

Active Thinking

We use oracy strategies such as think-pair-share and partner talk to build children's confidence and fluency. They are encouraged to apply their learning in a range of contexts, and 'no hands up' approaches ensure that everyone has the chance to participate

Practice and Repetition

Children regularly practise key skills in reading, writing and maths. Key concepts are used to connect new learning, and new skills are revisited often so that fluency and confidence can grow over time

Meaningful Connections

Children actively revisit prior learning to keep it fresh and secure. They compare, contrast and apply their knowledge in meaningful ways, supported by high-quality texts and materials that broaden their understanding of the world.
